rehab and wellness services

PREPARE FOR A SUCCESSFUL RECOVERY.

Aegis Therapies® understands that the road to recovery after amputation can be challenging. Aegis offers pre-prosthetic therapy, a program that provides rehabilitation after amputation.

This unique program provides a team that includes physical or occupational therapists and prosthetists who are all committed to helping each you regain your independence and adjust to life after amputation.

WHY DO I NEED PRE-PROSTHETIC THERAPY?

The time between surgery and receiving prosthesis is crucial to prepare your body for the increased demands that will be placed on it during prosthetic training. Our specialists can assist you with maximizing your potential. Benefits include:

- Joint protection of sound limb to prevent overuse complications
- Scar mobility techniques to reduce friction in socket and decrease risk of wounds
- Reestablishment of balance strategies
- Efficient movement strategies to ensure you are using your prosthesis optimally while minimizing energy expenditure
- Learning how to manage common complications
- Pain management
- Fall prevention and recovery skills
- Resuming more advanced functional activities that matter to you

Aegis is committed to being your partner throughout your recovery.
If you have questions regarding your recovery or treatment plan, call us today.
